SUMMARY

Backend engineer with 6 years building payment and API platforms in Go and Python.
Comfortable owning services end to end, from database to production.

EXPERIENCE

Senior Backend Engineer - Nubank, Sao Paulo (2021 - Present)

- Built and operated the transaction ledger service in Go, handling 25M requests/day.
- Cut p99 latency from 600ms to 90ms by reshaping the PostgreSQL access path.
- Introduced Terraform for all payment infrastructure.

Backend Engineer - iFood, Sao Paulo (2018 - 2021)

- Built the order dispatch API in Python (Django) serving 8,000 concurrent drivers.
- Added Redis caching that removed 55% of read load from PostgreSQL.

EDUCATION

BSc Computer Science - Universidade de Sao Paulo (2014 - 2018)

SKILLS

Go, Python, PostgreSQL, Redis, Docker, Kubernetes, AWS, Terraform, REST, gRPC, Git
